

WHAT'S SO COOL ABOUT TABLES READY?

- Clients can see their place in line
- Clients get a text notification when they're 2nd in line
- We can easily mark clients as served
- We can easily tell when a client arrived and how long they've waited
- We can import the list of appointments for the day to have walk-ins and appointments all in one place
- We can easily search the waiting list and recent guests list
- We can easily put someone from the recent guests list back in their same place in line in the waiting list
