

When a Taxpayer Has Multiple 1095-As

A taxpayer may come to the Tax Help Program with more than one **Form 1095-A** for household members who are enrolled in Marketplace coverage and will be listed on the tax return.

In these situations, **follow the instructions outlined below** to combine **Form 1095-A** entries for TaxSlayer input.

Column A:

- **ADD Column A amounts together** from each Form 1095-A for each month and enter in TaxSlayer. *Example: add all January amounts together from each 1095-A and enter in TaxSlayer.*

Column B:

- If Column B **amounts are the same** across all Form 1095-As for a month, **use the amount from Column B**. Do **NOT** add together.
- If Column B **amounts are NOT the same** across all Form 1095-As for a month, then **ADD Column B amounts together** from each 1095-A for that month.
- If **Column B** is blank and the tax return is for 2018 or later, use the tool at [Health Coverage Tax Tool](#) and click on **Get Started** to **Figure out your premium tax credit**.

Column C:

- **ADD Column C amounts together** from each Form 1095-A and enter in TaxSlayer.

Part III Coverage Information

Month	A. Monthly enrollment premiums	B. Monthly second lowest cost silver plan (SLCSP) premium	C. Monthly advance payment of premium tax credit
